H PRODUCTION Post Race Drivers' Quotes

Tom Feller, First Place

“Back to back to back is something that you do not expect. You expect to have some bad luck but I have had good luck all three times. Everything just went right which is unusual in racing. Last year everything went right and this year everything went right. We worked on the car all week and it kept getting better.”

Craig Chima, Second Place

“Three spins at a National Championship race is a bit interesting. The car was real loose and a combination of a loose car and some oil on the track made it real interesting. The first spin was at the left hander, I think that it was corner six, I had seen oil a couple laps earlier. The shine from it went away and the next time through I took a more traditional line through there and obviously the oil had not gone completely away and the car came around. Traffic helped me a bit and I got back up to Tom but then I had two spins on the front straight and I have no explanation for those. The car was a handful through that left hander. I also think we burned off the tires trying to chase Tom down.”

Don Barrack, Third Place

“We started off well but we hit some oil back about lap two or three and that dropped me back to 10th or 15th or something like that and had to charge our way back up through the field. But the guys ahead were just long gone. We turned our fastest laps by two or three seconds but there were so few laps left that it didn't matter.”
